Art Unit: 1762

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, 12-19 & 21-26 drawn to a method for kinetically spraying admixtures of magnetic powder and soft magnetic binder, where multiple substrates that are parts of electric machines may be kinetically sprayed, classified in class 427, subclass 128.
  - II. Claims 11, 20 & 27, drawn to electrical machines have been coatings with persistent magnetization and coatings that are coils, classified in class 428, subclass 692.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case other deposition processes can deposit equal to the magnetic coatings or generic coatings of unspecified material, especially considering alternative spray processes that may analogously deposit powdered material.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. A telephone call was made to James Proscla on 11/29/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

As of 12/09/2005 no election had been received, hence this restriction is being mailed.

Art Unit: 1762

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marianne L. Padgett whose telephone number is (571) 272-1425. The examiner can normally be reached on M-F from about 8:30 a.m. to 4:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks, can be reached at (571) 272-1423. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
